EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER IN TEST 1, VMC / RIOT GAMES, 2014-2015.

Created automation test cases in Python in a black box environment for *League of Legends*, an online game with millions of players world-wide. Analyzed and reported on results and reviewed code produced by the rest of the test team.

WEB APPLICATION DEVELOPER, CourtTrax, 2008-2012.

15400 SE 30th Pl Suite 202, Bellevue, WA 98007

Created new corporate website. Completely revamped the user interface for their court-record search tools. Led web application development using a jQuery-powered front-end connecting to MySQL databases through custom PHP scripts, including tools for taking notes, sharing documents, creating PDFs, and real-time chat. Rebuilt user interface to display real-time search results through JSON and Comet. Created new intranet site and overhauled internal customer relations management and usage tracking tools.

LEAD DEVELOPER, Blue Utopia / Jay Inslee Campaign, 2004-2008.

900 1st Ave So, Suite 304, Seattle, WA 98134

Lead developer for Blue Utopia's flagship product, online political Campaign Management tools to keep track of individuals and organizations, including contact information, personal and professional information, detailed call logs, event history, and contribution records, powered by an advanced Javascript front-end and PHP/MySQL.

WEB DEVELOPER, Classmates Online, Inc., 2001.

644 Strander Blvd, Suite 393, Seattle, WA 98188

Built web pages to spec, using their proprietary in-house language, TextForge, a combination of HTML and Perl.

WEB PROGRAMMER, CMi Worldwide, 1999-2000.

600 Stewart Street, Suite 700, Seattle, WA 98101

Developed Perl CGI apps for the portal site for their Internet appliance, the iCEBOX. including Address Book and Calendar programs, a complete e-commerce site, and customer relations management.

WEB PROGRAMMER, Talking Dog Media, 1998-1999.

1331 118th Ave SE Suite 300, Bellevue, WA 98005

Created, updated, and maintained websites for their clients. Created a keyword-based Perl CGI search engine for existing in-house graphics and assets. Developed a new web-based discussion forum and automated online coursework deployment tools for City University. Produced demos and learning aids in Macromedia Flash.
